

FERRET DIET COMPARISON

FERRETS NEED HIGH PROTEIN- LOW FIBER DIET.

Ferrets are true carnivores; in other words they are meat eaters and need a high quality source of animal protein. Their nutritional needs are very different from cats and dogs and they should be fed a ferret specific diet, which contains at least 36% protein, 22 % fat and very little fiber. Their food must also be hard and crunchy to promote good dental health. Few ferret diets contain the proper balance of nutrition, as seen in the chart below. We recommend [**Totally Ferret**](#), which contains quality ingredients and meets their nutritional needs.

Product	Minimum Crude Protein	Minimum Crude Fat	Minimum Crude Fiber
Exact (Kaytee Product)	32	20	3
Fiesta (Kaytee Product)	30	16	5
Forti-Diet (Kaytee Product)	35	18	4
Marshall Farms	38	18	3.5
Nutri-Life (Sheppard & Greene)	35	20	3
Totally Ferret (Performance Foods)	36	22	1.5
Ultra Blend Select (8 IN 1 Pet Products)	35	15	3
Premium Vita-Vittles Gold (L/M Animal Farms, Inc.)	32	10	4
Ultra Blend Ultimate (8 IN 1 Pet Products)	38	19	3
ZuPreem Premium Ferret Diet (Premium Nutritional Products)	40	20	2
